SUMMARY

Psychology graduate and Full Stack Software Engineer with a strong interest in building technology that is both functional and human-centered. Combines a solid understanding of human behavior with hands-on experience developing, debugging, and maintaining scalable applications using JavaScript, Python, React, and Flask. Skilled in system design, database programming, version control, CI/CD pipelines, and software deployment, with a thoughtful, problem-solving approach and a genuine passion for creating solutions that improve user experience and well-being.

WORK EXPERIENCE

Back-end engineer - SankofaConnect solutions

NOVEMBER, 2025 – Present

- Designed and implemented secure, scalable database systems supporting POS machine integrations with Odoo, enabling reliable storage and processing of thousands of daily transaction records while improving data integrity and system performance.
- Led backend development and integration of POS machines with Odoo ERP, successfully deploying production-ready solutions for multiple clients and reducing transaction errors and system downtime through effective debugging and testing.
- Managed software deployment, maintenance, and version control using Git and CI/CD practices, ensuring stable releases, faster issue resolution, and improved system reliability across client environments.
- Provided ongoing technical support and backend troubleshooting for client systems, resolving critical issues promptly and contributing to improved customer satisfaction, long-term client retention, and smooth day-to-day operations.

Psychologist - Kahawa West Health Center

May, 2024 – October, 2024

- Helped in psycho-education/treatment literacy to clients on how to take their ARVs
 - Provided empathetic support and guidance to clients, ensuring a smooth transition through their treatment journey and improving overall satisfaction.
 - Developed a comprehensive psycho-education program that increased client understanding of treatment options, fostering a supportive environment for mental health.
 - Entered client data into the hospital system and medical diaries to accurately record and manage client information.
-

OTHER WORK EXPERIENCES

Polling clerk - I.E.B.C

- August, 2022

Supply Merchant

- April, 2021 - September, 2021

EDUCATION

BACHELOR OF ARTS COUNSELLING PSYCHOLOGY

KCA UNIVERSITY - (Second class upper)

- September, 2020 - November, 2024

SOFTWARE ENGINEERING

MORINGA SCHOOL

- May , 2025 - November, 2025

KENYA CERTIFICATE OF SECONDARY EDUCATION

QUEEN OF APOSTLES SEMINARY - (C+)

- January, 2016 - November, 2019

OTHER CERTIFICATIONS

AFRICAN INSTITUTE OF MANAGEMENT

PROJECTS

Jewelry Store Manager App

Freelance Project | 2025

- Designed and maintained a secure, well-structured database to manage jewelry inventory, categories, and store data.
- Implemented backend logic for dynamic category selection and product organization, ensuring accurate item filtering and retrieval.
- Designed intuitive UI/UX flows and applied frontend logic to enhance usability and overall customer experience.
- Successfully integrated frontend and backend components to deliver a fully functional, reliable jewelry management application.

BASKETBALL PROGRAM MANAGER - (C.L.I APP)

Freelance Project | 2025

- Developed a command-line application to manage basketball program operations, focusing on performance, reliability, and usability.
- Handled database administration and contributed to website-related design components supporting the application.
- Built efficient core CLI operations using structured, well-organized code with strong input validation and exception handling to ensure error-free execution.
- Translated program requirements into functional command-line features, improving usability through clear commands, flags, and informative output messages.

SKILLS

- **Software Development & Engineering:** Backend and Full Stack Development, Python, Flask, JavaScript, React.js, API Integration, Structured Programming, System Architecture Design, Software Debugging, Deployment & Maintenance.
- **Data & Database Management:** Database Design, MySQL, SQLAlchemy, Data Modeling, Data Integrity, Data Analysis, Data Interpretation.
- **Problem Solving & Analysis:** Analytical Thinking, Critical Thinking, Root Cause Analysis, Requirements Analysis, Research Methods, Logical Reasoning.
- **Human-Centered Design & Psychology:** User Experience (UX), Design Thinking, Human Behavior Analysis, Empathy-Driven Design, Ethical Data Handling.
- **Communication & Collaboration:** Technical Documentation, Active Listening, Stakeholder Collaboration, Client Support, Cross-Functional Teamwork.
